HOLISTIC VIEW

KEY CAPABILITIES

- 
 Puts you on a path to always operate in a *Known Good State* and achieve a *Zero-Incident Vision*
- 
 Improves application availability, shrinks level 1, 2 support costs, and drives key metrics like MTRR
- 
 Delivers curated insights and intelligent recommendations based on correlation, co-occurrence and log analytics to enable faster RCA and incident resolution
- 
 Addresses everyday pains like alert fatigue, making sense of your data, and trial & error remediation.
- 
 Continuously collects data from the entire stack – application, DB and infrastructure; extensible to non-SAP stacks

SOLUTION OVERVIEW

Alert Monitoring & Management → Incident Investigation → Problem Remediation

Anomaly Detection	Incident Contextualization	Proactive Resolution
Behavior Profiling	Policy-based Escalation	Rules-Driven Team Mobilization
Dynamic Thresholds	Accelerated Root Cause Analysis	Remediation Workflow
AI-Guided Scoring	Automated Recommendations	Closed-Loop Learning
